Your gluing solutions partner

ACCESORIES FOR MELTERS

COMPATIBLE WITH

● B4 Series

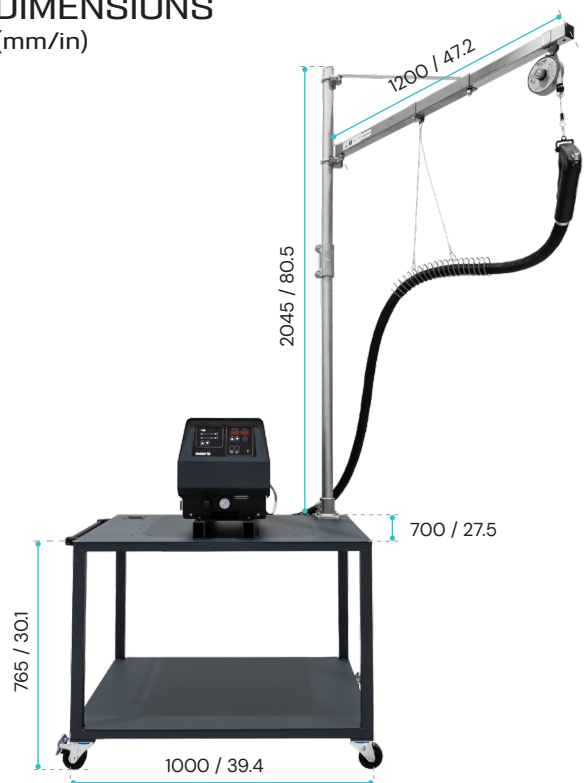

● MICRON+ Series

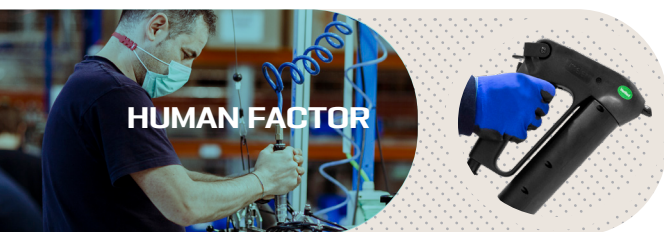

● SF Series

DIMENSIONS

(mm/in)

COMPLETE APPLICATION SYSTEMS

User-Centered Design

Meler focus on the users to understand their needs during the hotmelt application process.

We offer complete solutions for industrial enviroments with quality and robustness criteria.

Empowering users

To optimize the operator's performance, the hanger balances weight and provides better accuracy to the application.

Fewer and more efficient lifting operations.

It helps to avoid delays.

Proper ergonomic design

The trolley fits the user to enhance comfort:

- The balancer rotates according to user's parameters: position, type of movement, height, etc
- Improves work posture for greater efficiency
- Prevents work-related disorders

Ready to work everywhere

Greater flexibility thanks to a mobile workstation (maximizes production space).

The mast can be configured left or right depending on the position of the hose.

Gain productive space with storage in the lower rack.
